

Outline Specification

Pullmax 720

Bridge frame CNC punching machine with full brush table

Fanuc control

Hydraulic programmable head

20 indexable tool stations with 90 mm maximum diameter

Each station is fully indexable 360 degrees •

Minimizes tool change and set-up time •

All stations can be equipped with punching, forming, bending or tapping tools •

Quick change punch and die holders •

Standard Trumpf® style tooling system

Indexable Multi-Tool (5 or 10 stations)

PARTS CHUTE • Programmable 500 x 525 mm parts chute •

Bend small boxes, brackets, knockouts, louvers and countersinks with -angle heights up to 75 mm

Arguably not a Turret machine and not a Trumpf. Has the benefits of both. Pullmax designed this machine which was highly successful but discontinued when LVD acquired Pullmax

A very capable machine tool with support available in the UK With the control and head manufactured and supported by 3rd parties it is a safe investment
